

Kitchen

COLLECTION

2023 Brochure

We specialise in quality kitchens and bedrooms for less.
All our furniture is easy to like, easy to buy and easy to fit and once you have one we know you will love it!

Our cabinets are of traditional 'glue and dowel' construction and are produced using the latest computer controlled machinery throughout the manufacturing process. We are so confident in our product, that it comes with a reassuring 10 year guarantee on all of our cabinets.

Please see a summary of our guarantee of individual items listed below.

10 years – Cabinet, drawer boxes, door hinge & drawer runners

5 years – Doors, drawer fronts, internal storage solutions and handles

1 year – Other accessories

We reserve the right to change products at any time.

Please note: Due to photographic and printing processes, the colours shown here may not be a true representation of the product. Please see samples for the actual colours.

There are many reasons to choose one of our kitchens.

Our kitchens are simple to buy and easy to fit. Take a closer look and you'll find many more reasons to choose a kitchen from us over any other.

...here are just a few of them.

1 20 cabinet finishes
We have 20 cabinet finishes that match or complement the majority of our door finishes. They look as good on the inside as they do on the outside, which is the sign of a quality manufacturer and they minimise costly finishing panels.

2 Glue & dowel construction
A rigid cabinet is a must in a top quality kitchen. Our cabinets are made using glue and dowel construction and each one is made to order meaning only the holes that are required are drilled.

3 Internal Accessories
We use the highest quality internal accessories from Kesseböhmer. These include corner Cantilever and Pull-Out access solutions, along with Base, Wall and Tall pull-outs for easy accessible storage.

4 High quality drawers
We offer a choice of drawers in either steel or wood. Both with soft closing full extension runners with capacity to hold up to 65kg.

5 Unit availability
We offer one of the widest range of unit widths in the market, ensuring maximum storage utilisation and therefore avoiding the need for unnecessary filler panels.

6 Range of lighting
We offer a wide range of lighting from mood, task and convenience to add that finishing touch to your kitchen.

7 Complementary worktops
With 40 traditional and contemporary finishes, ranging from a slim 16mm square edged worktop through to 38mm radiused style, you are guaranteed to find the perfect match for your dream kitchen.

8 All cabinets are made to order & hand built in the UK.

To help you choose, please use our simple style guide.

Profile Pages 6 to 18

A Profile kitchen creates a true handleless look by using a profile rail to allow easy door opening. The profile rail is available in nine complementary finishes.

Slab Pages 20 to 43

Slab kitchens are perfect for those seeking a minimalist feel. These doors can be used with an extensive range of attractive handles allowing you to create an individual look.

Please see our extensive range of handles on pages 100 and 101.

Shaker Pages 44 to 71

The Shaker kitchen design is a true classic suitable for a broad range of homes. There is a wide range of choice from traditional through to modern shaker style kitchens.

Please see our extensive range of handles on pages 100 and 101.

Handleless Pages 72 to 79

Handleless kitchen doors are perfect for the stylish modern kitchen with an integrated 'J' pull grip to create a visually handleless look and feel.

Profile Kitchens

A true handleless Kitchen

Over the next few pages you will see our collection of Profile kitchens that create a truly handleless look using a profile available in 9 complementary finishes.

Pages 8 to 17.

Lighting solutions for your kitchen

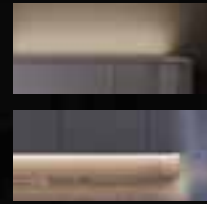

Getting the lighting right in your kitchen is critical, it's the room that attracts the most use both day and night, so creating the mood that you desire can be done with careful planning. Please consider the choice of lighting options shown on the right, to create sufficient lighting for task, mood and convenience.

1. Over Cabinet & Plinth

LED flexible strip lighting added to the top or around the plinth enhancing the ambiance of the kitchen.

2. Under Cabinet Spot & Strip

Sufficient lighting is a must in task based areas where hobs, sinks and worktop surfaces are in use.

3. Drawer & In Cabinet

Lighting in cupboards and drawers adds the finishing touch to your kitchen.

4. Bluetooth Control

Bluetooth dimming and light temperature level control from your phone or tablet allowing many choices in lighting ambience.

5. Pop-up & Flip Over Point

This allows the user to plug in any appliance and charge any USB powered device within the convenience of the kitchen.

6. Colour Temperature

Most lighting is available in natural or warm white. In addition to these choices a range of tunable lights are available, allowing you to choose from cool to natural to warm white light to create your own lighting mood.

Clever storage

Everything in it's perfect place.

Everything within reach. **Easy to use and enjoy.**

Sometimes the simplest things are the most extraordinary.

Just as nature exhibits amazing efficiency among its elements, Kesseböhmer strives to achieve the perfect balance between form and function. And after 55 years, you can rest assured, they've figured it out. With clever storage that considers convenience for today's multi-use kitchens as much as it considers capacity. The elegance and functionality of the Cantilever Corner, Kesseböhmer turns ordinary cabinets into extraordinary kitchens. Truly innovative designs with non-slip surfaces, transparent storage and smooth handling that deliver a level of simplicity that is naturally easy to use and enjoy.

Tall Pull-Out Larder Unit

Although we can easily go out and fetch supplies practically whenever we like by popping to the nearest supermarket or even a petrol station (at night time or late on Sundays), every household still keeps a stock of foods. Pasta, sugar, flour, rice, salt, cocoa, jam, tinned food, sauces, ketchup ... are just a few examples.

Even this short list is enough to explain why it is that most people end up significantly underestimating the quantity and value of their own stored foods. One of the main reasons for this is that many kitchens do not have a specific, central place for stored foods. Instead, people nearly always store food in a wide range of cupboards. And that is anything other than ideal. You lose track of everything, you waste time searching for things and many foods are simply overlooked or forgotten. This leads to unnecessary duplicate purchases and is exactly the opposite of what you want. Now, at last, there is a solution with our tall Pull-Out Larder Unit!

150 Pull-Out

Good ideas fit in anywhere. Kesseböhmer creates much more than a tiny filler. When placed by the oven, the 150mm Pull-Out is the convenient solution for spices, baking trays or an indispensable towel. The high quality fitting lends even the smallest kitchen cabinets that special touch of elegance.

With Kesseböhmer - the worlds leading premium storage brand, our Kitchens include great design ideas not just on the outside but on the inside too.

Kesseböhmer storage solutions provide stylish, practical and functional solutions providing better organised and easier access to storage space. In addition to brilliant functionality, Kesseböhmer storage solutions stand for exclusive design and a high quality finish. Internal cabinet space is used more efficiently than conventional systems, helping you get the most out of your kitchen.

Cantilever Corner

Combines optimal space utilisation with a clear overview and ease of use. You can store a lot of pots and pans - and each one is always in easy reach.

Pull-Out Corner

Pull once gently and both the front pull-out and the rear one move forward into easy reach - all in one noiseless, flowing movement.

3/4 Carousel Corner

Quality Carousel Corner trays are offered in a contemporary silver grey finish with solid bases that provide for a stable non-slip storage solution.

The iMove

The intelligent pull-down system for wall units.

This pull down wall unit shelf system enables access to those difficult to reach areas. With an easy to operate pull down system which locks into an open position and then closes easily with one effortless movement. Transforming the classic wall unit in to an effective way of storing those everyday kitchen items.

Recycling Waste Bins

We have a selection of bins available to solve your recycling problems.

Our range of solutions makes recycling quicker and easier and what's more all of our bins are cleverly integrated within the kitchen!

Pull out waste bin units with recycling compartments available in 300, 400, 450, 500 & 600mm widths

Pull-Out Waste Bin

Alusplash Backsplash

AluSplash is an aluminium kitchen splashback which is fire resistant, grout free and easy to clean and maintain. It is the ideal interior wall panel, as it gives a modern finish to any kitchen space.

Safe, Hygienic & Low Maintenance

- Grout free and non-porous
- Dirt and grime can be easily wiped and cleaned with a microfiber cloth
- Non-toxic and Lead-free paint surface
- Will not shatter or crack like glass
- Easy to clean and maintain

Eco Friendly

- 100% post-consumer recyclable
- Non-toxic and Lead-free
- No emissions of greenhouse gases during production

Fire Resistant

- Fire rated and safe to use behind gas hobs, unlike acrylic splashbacks
- Suitable to be used behind all popular hobs
- Maintain a 30mm / 1.18" distance from the edge of the hob

Quick & Easy to Install

- Does not require expensive professional installation
- Fabricate with normal wood working tools
- Can be installed 3 times faster than tile splashbacks
- Can be V-grooved & folded around the corners, without joints
- Easy to make cut outs for electrical sockets
- Full range of edge and corner profiles available for a clean finish

Essential Planning Information

Planning Your Space

The kitchen is the heart of every home, now used for so much more than just cooking. When you are ready to begin planning look carefully at the available space. What shape is the room and how can you get the most out of it, taking into account all the requirements of your busy lifestyle.

Layout Considerations

Consider how you use your kitchen and what you like about it. Think about what you would change from increasing storage space to ensuring you have enough preparation area. Make a list of the things you'd like to keep and what you'd like to change. This will be useful when planning your space.

Working Zones

Most kitchens work best divided into work zones covering storage (fridge/freezer/larder), washing (sink/dishwasher) and cooking (oven/hob).

The relationship between these three zones are often referred to as 'the working triangle' and if positioned correctly will ensure a practical and efficient layout making the kitchen a joy to use.

Measuring your space

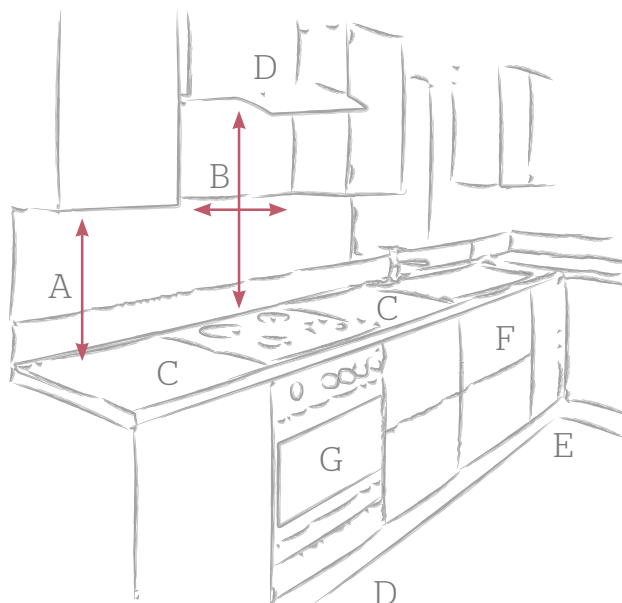

Successful kitchen planning starts with accurate and precise measurements. Careful preparation at this stage will ensure a smooth process leading to a kitchen that will fit perfectly.

1. Start by measuring the overall length of all walls and the height from floor to ceiling and record these in millimetres on your plan.
2. Measure each window and door by detailing the floor to sill, the height and width and the distance from the ceiling and room corners remembering to include the frame.
3. Check for obstructions such as radiators, meters, extractors or ventilation grilles and detail these on the plan.
4. Note the position of any stop taps, water and gas pipes and outside drain that the waste pipe runs into.
5. Finally mark any existing power points and light switches on your plan.

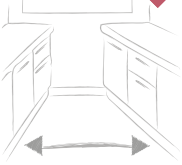

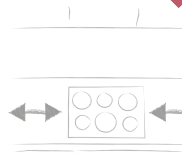

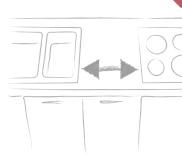

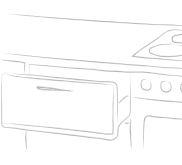

Further tips

- A. Splashback height
- B. Hob clearances
- C. Preparation spaces
- D. Oven ventilation
- E. Corner planning
- F. Drawer options
- G. Appliances

Design points to consider

 <p>Allow sufficient space to pass comfortably between units remembering to allow for doors and drawers to open fully.</p>	 <p>Small fillers should be planned between all walls and units allowing for uneven walls and clearance for door opening.</p>	 <p>Think about providing space to place hot pans onto a pan stand close to the hob.</p>	 <p>Plan sufficient worktop space for preparation especially in the hob and sink area.</p>
 <p>Place on an outside wall if possible and ensure manufacturers recommended extractor / hob clearances are maintained.</p>	 <p>Consider the appliances you have and any additional ones you would like to include.</p>	 <p>Think about drawer and pan drawer storage requirements and their location for ease of access.</p>	 <p>Dishwashers should be as close to the sink as possible for ease of use and plumbing.</p>
 <p>If possible avoid placing drawer units in corner situations.</p>	 <p>It is not recommended to plan ovens adjacent to walls.</p>	 <p>It is not recommended to plan sinks adjacent to walls.</p>	 <p>It is not recommended to plan ovens in corner situations.</p>

Finishing touches

Once you are happy with the overall layout consider including some additional design features such as glazed wall units or lighting to complete your kitchen.

Collect ideas for colour schemes from magazines and the internet. Make a lifestyle board to compare colours and finishes for walls, flooring and fabrics. This will help with your design.

Cabinet features

- 1 Traditional Glue and dowel construction supplied fully assembled.
- 2 Rigid 19mm MFC Cabinets in 20 colour options with 8mm matching backs.
- 3 Handed cabinet units without unsightly drillings.
- 4 Solid top shelf on base units, sink & hob units supplied with rail for access.
- 5 Robust Thermoplast ABS edging to all exposed edges.
- 6 All cabinets have built in soft closing systems fitted to doors, drawers and mechanisms.
- 7 500 deep grey steel drawers complete with steel backs, supplied with soft closing and full extension runners. Pan drawers are fitted with 201mm high backs and square gallery side rails.
- 8 30Kg standard steel drawer capacity. 50Kg on 800/900/1000 widths.
- 9 Quality internal wirework fittings in a silver grey finish with soft close mechanisms.
- 10 All metal 110° 3 way fully adjustable clip on hinges for easy adjustment and removal if required.
- 11 Fully adjustable concealed wall cabinet hanging brackets provide a secure and neat finish.
- 12 Adjustable middle shelves edged all round with Stainless steel shelf support pegs.

- 13 Fitted integrated door buffers on all door and drawer fronts.
- 14 150mm adjustable legs with 5th leg on double cabinets.
- 15 Base & Tall cabinet service void gap of 47mm, Wall cabinet void of 17mm.

Optional Features

- Wooden oak dovetail drawer box and pan drawer options.
- Aluminium sink drip trays.
- Extensive choice of handle styles & finishes.
- Additional middle shelf for Hi-line base units.
- Non-slip drawer insert mats.
- Plinth sealing strip floor profile.

All cabinets are made to order & hand built in the UK.
